for soldiers of Johnston's Army, some of whom are said to have died and been buried on the top of the pass between the Colorado Basin and the Great Basin.¹⁵ The town at one time was the center of Denver & Rio Grande railroad shop activity, but since the withdrawal of the shops most of the homes were torn down.

settlement, of course, was at Heber City, but there were also two small settlements along the Snake Creek, a number of families at Center Creek, some at Charleston, some in Round Valley or Wallsburg, a small cluster of houses at the Sessions spring and a few at a sheep ranch of Melvin Ross, afterwards known as Hailstone's Ranch, about eight miles north of Heber.

The first county road was established on March 3, 1862, and commenced at the Provo River below Manning's (southwest of the town of Charleston) and ran in a northerly direction following the old immigrant trail through the valley, passing by Melvin Ross' ranch and terminating at the northern boundary of the county known then as the Ross Summit.

Another county road was established April 26, 1862 and ran between Heber City and Center Creek and on to a sawmill in Center Creek Canyon.

Four school districts were also designated in April, 1862. They were district No. 1 to include Heber City; No. 2 at the Center Creek settlement; No. 3, the lower settlement on Snake Creek and No. 4 the upper Snake Creek settlement.

The first valuation of property for the county took place in 1862, and according to the report of John Harvey, assessor and collector, the property value in the valley was \$48,350.

Spring came late in 1862 and it was May 4 before any plowing could be done in the valley. The Church leaders who went to Salt Lake City for general conference sessions in April had to travel on snowshoes to get through the more than four feet of snow still on the ground.

Early in 1862 John H. Van Wagoner finished building a gristmill at Snake Creek's lower settlement. Even though there was no way to separate the smut from the wheat and some of the flour made was very dark, the people were still glad for this added improvement. At times that year the river was so high people couldn't get across to the mill. However, Henry McMullin, a ship builder from Maine, built a boat and the grist was taken back and forth on the boat. It was this same Mr. McMullin that built the first sawmill in the valley. It was owned by William M. Wall and James Adams and located in Center Creek Canyon.

Until the sawmill was built, people had used hand-prepared timber for all their furniture and other needs. Now with cut lumber available the rough furniture was quickly discarded.

Many of the people were able to obtain good wagons from the soldiers in Johnston's Army. The army had camped near Utah Lake until the outbreak of the Civil War in the East. They were summoned to return to the Northern Army's camps and so they sold some of their wagons and their supplies very cheaply rather than carry them back east. Many in Wasatch County obtained the wagons as the troops passed through the valley on their eastern trip.

With the death of John H. Keetley at his home in Salt Lake City October 2, 1912, there passed from sight one of the most pic-

UTAH AND THE PONY EXPRESS

turesque characters of the mining business in early days. He was seventy-one years of age at the time of his death. Known in almost every mining camp in the west his adventures could fill a volume. The famous Last Chance property at Bingham was purchased from the original locator by Mr. Keetley for a horse and saddle, and he paid for building a cabin on the claim with a six shooter. After working the property for a year Mr. Keetley sold it for \$17,000. Since then the claim yielded about \$1,000,000 worth of ore. In the early seventies he was associated with mining operations in Little Cottonwood and later he went to Deadwood, South Dakota where he was manager of the Sir Roderick Dhu mine in 1877. Returning to Utah he was placed in charge of the Ontario drain tunnel No. 1 at Park City in 1881, and superintended the extension of the tunnel to the No. 3 shaft. Afterward he went to the Anglo-Saxon mine in Butte, Montana, then to the Kentucky mine in Shoup, Idaho, returning to Park City to take charge of the Ontario drain tunnel No. 2 in 1888. He also became associated with the Little Bell and Silver King Consolidated mines in that district. The little mining town of Keetley was named in his honor. He was a great lover of horses and owned some fine racing stock.

During the days of the Pony Express Jack was one of its most colorful riders, often being called "The Joyous Jockey." He was born November 28, 1841 and was reared in Marysville, Kansas. He rode the ponies the entire life of the Express. In later years he wrote the following letter in answer to a request concerning the riders of the Pony Express:

Mr. Huston Wyeth,
St. Joseph, Missouri.

Dear Sir:

Yours of the 17th inst. received and in reply will say that Alex Carlyle was the first man to ride the Pony Express out of St. Joe. He was a nephew of the superintendent of the stage line to Denver, called the Pike's Peak Express. The superintendent's name was Ben Ficklin. Carlyle was a consumptive and

Mr. Huston Wyeth,
St. Joseph, Missouri.

Dear Sir:

Yours of the 17th inst. received and in reply will say that Alex Carlyle was the first man to ride the Pony Express out of St. Joe. He was a nephew of the superintendent of the stage line to Denver, called the Pike's Peak Express. The superintendent's name was Ben Ficklin. Carlyle was a consumptive and

could not stand the hardships and retired after about two months trial and died within six months after retiring. John Frye was the second rider, and I was third, and Gus Cliff was the fourth. I made the longest ride without a stop, only to change horses. It was said to be 300 miles and was done a few minutes inside of twenty-four hours. I do not vouch for the distance being correct as I only have it from the division superintendent, A. E. Lewis, who said that the distance given was taken by his English roadmeter which was attached to the front wheel of his buggy which he used to travel over his division with and which was from St. Joe to Fort Kearney. The ride was made from Big Sandy to Ellwood, opposite St. Joe, carrying the east going mail, and returning with the westbound mail to Seneca without a stop, not taking time to eat, but eating my lunch as I rode. No one else came within sixty miles of equaling this ride and their time was much slower. The Pony Express, if I remember correctly started at 6 o'clock p.m., April 3, 1860, with Alex Carlyle riding a nice brown mare and the people came near taking all the hair out from the poor beast's tail for souvenirs. His ride was to Guittard's, 125 miles from St. Joe. He rode this once a week. The mail started as a weekly delivery and then was increased to semi-weekly inside of two months. The horses, or relays, were supposed to be placed only ten miles apart, and traveled a little faster than ten miles per hour so as to allow time to change, but this could not always be done, as it was difficult then in the early settlement of the country to find places where one could get feed and shelter for man and beast, and sometimes horses had to go twenty-five to thirty miles, but in such cases there were more horses placed at such stations to do the work, and they did not go as often as the horses on the shorter runs. At the start the men rode from 100 to 215 miles, but after the semi-weekly started they rode about 75 to 80 miles. My ride and those of the other boys out of St. Joe was 125 miles to Guittard's, but later we only rode to Seneca, eighty miles. The first pony started from the one-story brick express office on the east side of Third Street, between Felix and Edmond streets, but the office was afterwards moved to the Patee House.

At 7 o'clock a.m., we were ordered from the stables two blocks east of the Patee House which was the signal for the ferry boat to come from Ellwood and to lie in waiting at the landing until our arrival. We rode into the office and put on the mail, which consisted of four small leather sacks six by twelve inches, fastened onto a square holder which was put over the saddle. The sacks were locked with little brass locks much like one sees today on dog collars, and the sacks were sewed to the holders, one in front and one behind each leg of the rider. When the mail was put on and the rider mounted on his race

horse, which was always used out of St. Joe to the Troy Station, nine miles from Ellwood, he bounded out of the office door and down the hill at full speed, when the cannon was fired again to let the boat know that the pony had started, and it was then that all St. Joe, great and small were on the sidewalks to see the pony go by, and particularly so on the route that they knew the pony was sure to take. We always rode out of town with silver mounted trappings decorating both man and horse and regular uniforms with plated horn, pistol, scabbard and belt, etc. and gay flower-worked leggings and plated jingling spurs resembling, for all the world, a fantastic circus rider. This was all changed, however, as soon as we got on the boat. We had a room in which to change and to leave the trappings until our return. If we returned in the night, a skiff or yawl was always ready and a man was there to row us across the river, and to put the horse in a little stable on the bank opposite St. Joseph. Each rider had a key to the stable. The next day we would go to the boat, cross the river, bring our regular horse and our trappings across to the St. Joe side. We stayed in St. Joe about three days and in Seneca about the same length of time, but this depended pretty much on the time that we received the mail from the west. The Pony Express was never started with a view to making it a paying investment. It was a put-up job to change the then Overland mail route which was running through Arizona on the southern route, to run by way of Denver and Salt Lake City, where Ben Holladay had a stage line running tri-weekly to Denver and weekly to Salt Lake.

The object of the Pony Express was to show the authorities at Washington that by way of Denver and Salt Lake to Sacramento was the shortest route, and the job worked successfully, and Ben Holladay secured the mail contract from the Missouri to Salt Lake, and the old southern route people took it from Salt Lake to Sacramento. As soon as this was accomplished and the contract awarded, the pony was taken off, it having fulfilled its mission. Perhaps the war also had much to do with changing the route at that time.

JAY G. KELLEY

Boliver Roberts, western superintendent of the Pony Express, hired Jay G. Kelley to help establish relay stations as far east as Roberts Creek because of his knowledge of the surrounding country. For a time he served as assistant station keeper at Cold Springs, but, early in 1860, one of the riders was killed by Indians and Kelley, weighing only one hundred pounds, became an express rider for the duration. After the "Pony" days were over Jay became a captain of Company C. in the later years of the Civil War and when peace was again restored between the North and South, he went to Denver,

My ride and those of the other boys out of St. Joe was 125 miles to Guittard's, but later we only rode to Seneca, eighty miles. The first pony started from the one-story brick express office on the east side of Third Street, between Felix and Edmond streets, but the office was afterwards moved to the Patee House.

At 7 o'clock a.m., we were ordered from the stables two blocks east of the Patee House which was the signal for the ferry boat to come from Ellwood and to lie in waiting at the landing until our arrival. We rode into the office and put on the mail, which consisted of four small leather sacks six by twelve inches, fastened onto a square holder which was put over the saddle. The sacks were locked with little brass locks much like one sees today on dog collars, and the sacks were sewed to the holders, one in front and one behind each leg of the rider. When the mail was put on and the rider mounted on his race

56

UTAH AND THE PONY EXPRESS

horse, which was always used out of St. Joe to the Troy Station, nine miles from Ellwood, he bounded out of the office door and down the hill at full speed, when the cannon was fired again to let the boat know that the pony had started, and it was then that all St. Joe, great and small were on the sidewalks to see the pony go by, and particularly so on the route that they knew the pony was sure to take. We always rode out of town with silver mounted trappings decorating both man and horse and regular uniforms with plated horn, pistol, scabbard and belt, etc. and gay flower-worked leggings and plated jingling spurs resembling, for all the world, a fantastic circus rider. This was all changed, however, as soon as we got on the boat. We had a room in which to change and to leave the trappings until our return. If we returned in the night, a skiff or yawl was always ready and a man was there to row us across the river, and to put the horse in a little stable on the bank opposite St. Joseph. Each rider had a key to the stable. The next day we would go to the boat, cross the river, bring our regular horse and our trappings across to the St. Joe side. We stayed in St. Joe about three days and in Seneca about the same length of time, but this depended pretty much on the time that we received the mail from the west. The Pony Express was never started with a view to making it a paying investment. It was a put-up job to change the then Overland mail route which was running through Arizona on the southern route, to run by way of Denver and Salt Lake City, where Ben Holladay had a stage line running tri-weekly to Denver and weekly to Salt Lake.

The object of the Pony Express was to show the authorities at Washington that by way of Denver and Salt Lake to Sacramento was the shortest route, and the job worked successfully, and Ben Holladay secured the mail contract from the Missouri to Salt Lake, and the old southern route people took it from Salt Lake to Sacramento. As soon as this was accomplished and the contract awarded, the pony was taken off, it having fulfilled its mission. Perhaps the war also had much to do with changing the route at that time.

JAY G. KELLEY

Boliver Roberts, western superintendent of the Pony Express, hired Jay G. Kelley to help establish relay stations as far east as Roberts Creek because of his knowledge of the surrounding country. For a time he served as assistant station keeper at Cold Springs, but, early in 1860, one of the riders was killed by Indians and Kelley, weighing only one hundred pounds, became an express rider for the duration. After the "Pony" days were over Jay became a captain of Company C. in the later years of the Civil War and when peace was again restored between the North and South, he went to Denver,

With the death of John H. Keetley at his home in Salt Lake City October 2, 1912, there passed from sight one of the most picturesque characters of the mining business in early days. He was seventy-one years of age at the time of his death. Known in almost every mining camp in the west his adventures could fill a volume. The famous Last Chance property at Bingham was purchased from the original locator by Mr. Keetley for a horse and saddle, and he paid for building a cabin on the claim about \$1,000,000 worth of ore. In the early seventies he was associated with mining operations in Little Cottonwood and South Dakota where he was manager of the Sir Roderick Dhu mine in 1877. Returning to Utah he was placed in charge of the Ontario drain tunnel No. 1 at Park City in 1881, and superintended the extension of the tunnel to the No. 3 shaft. Afterward he went to the Anglo-Saxon mine in Butte, Montana, then to the Kentucky mine in Shoup, Idaho, returning to Park City to take charge of the Ontario drain tunnel No. 2 in 1888. He also became associated with the Little Bell and Silver King Consolidated mines in that district. The little mining town of Keetley was named in his honor. He was a great lover of horses and owned some fine racing stock.

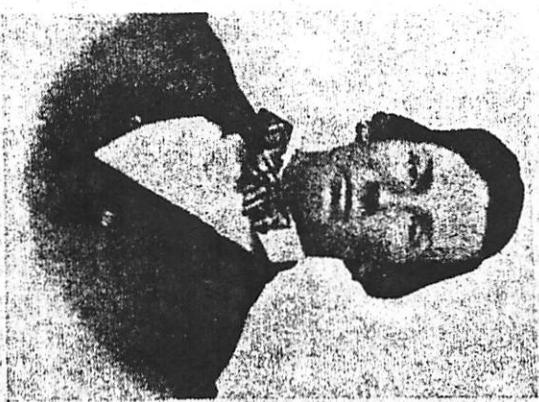

During the days of the Pony Express Jack was one of its most colorful riders, often being called "The Joyous Jockey." He was born November 28, 1841 and was reared in Marysville, Kansas. He rode the ponies the entire life of the Express. In later years he wrote the following letter in answer to a request concerning the riders of the Pony Express:

Mr. Huston Wyeth,
St. Joseph, Missouri.

Dear Sir:

Yours of the 17th inst. received and in reply will say that Alex Carlyle was the first man to ride the Pony Express out of St. Joe. He was a nephew of the superintendent of the stage line to Denver, called the Pike's Peak Express. The superintendent's name was Ben Ficklin. Carlyle was a consummate and

Mr. Huston Wyeth,
St. Joseph, Missouri.

Dear Sir:

Yours of the 17th inst. received and in reply will say that Alex Carlyle was the first man to ride the Pony Express out of St. Joe. He was a nephew of the superintendent of the stage line to Denver, called the Pike's Peak Express. The superintendent's name was Ben Ficklin. Carlyle was a consummate and

could not stand the hardships and retired after about two months trial and died within six months after retiring. John Frye was the second rider, and I was third, and Gus Cliff was the fourth. I made the longest ride without a stop, only to change horses. It was said to be 300 miles and was done a few minutes inside of twenty-four hours. I do not touch for the distance being correct as I only have it from the division superintendent, A. E. Lewis, who said that the distance given was taken by his English roadmeter which was attached to the front wheel of his buggy and returning with the westbound mail to Seneca without a stop, not taking time to eat, but eating my lunch as I rode. No one else came within sixty miles of equaling this ride and their time was much slower. The Pony Express, if I remember correctly

started at 6 o'clock P.M., April 3, 1860, with Alex Carlyle riding a nice brown mare and the people came near taking all the hair out from the poor beast's tail for souvenirs. His ride was to Guittards, 125 miles from St. Joe. He rode this once a week. The mail started as a weekly delivery and then was increased to semi-weekly inside of two months. The horses, or relays, were supposed to be placed only ten miles apart, and traveled a little faster than ten miles per hour so as to allow time to change, but this could not always be done, as it was difficult then in the early settlement of the country to find places where one could get feed and shelter for man and beast, and sometimes horses had to go twenty-five to thirty miles, but in such cases there were more horses placed at such stations to do the work, and they did not go as often as the horses on the shorter runs. At the start the men rode from 100 to 215 miles, but after the semi-weekly started they rode about 75 to 80 miles. My ride and those of the other boys out of St. Joe was 125 miles to Guittard's, but later we only rode to Seneca eighty miles. The first pony started from the one-story brick express office on the east side of Third Street, between Felix and Edmond streets, but the office was afterwards moved to the Patee House.

At 7 o'clock a.m. we were ordered from the stables two blocks east of the Patee House which was the signal for the ferry boat to come from Ellwood and to lie in waiting at the landing until our arrival. Of Mines and Men—the Story of Keetley

Few pursuits in life have had more influence on men than mining. Civilization itself prospered as men learned to take metal ores from the earth and fashion the substances into useful tools. Precious minerals and valuable ores have caused great cities and small towns to rise and fall with mining's fortunes and tides. Many men have given their lives as they struggled to take nature's treasures from deep within the earth. Mining, too, has usually written the character references of those who pursued it, as some have been motivated by a sincere desire to find things they could share and others have searched only for themselves and their greed.

Wasatch County has been vitally concerned with mines and miners, as has already been explained in earlier chapters. Vigorous mining in progress in the Park City area had a great impact on commerce and industry in Wasatch towns, and much of the county's colorful history centers around the men of the mines.

The county's northern-most settlement, the town of Keetley, owes its existence to mining activity. It was the last community in the county to be organized, and for several decades was known and identified only as a mining shaft. Its location was first plotted in 1887 when leaders of the Park City Mining District chose a point of elevation for the portal of a drainage tunnel from the properties of the Daly Mining Company and the Ontario Silver Mining Company.

The Ontario-Daly No. 2 Drain Tunnel, as the project became known, was a tremendous undertaking for the time. It was to be more than 15,000 feet in length, cost nearly half a million dollars and take six years to complete. By 1898 the tunnel had been extended from the present site of Keetley into the Daly West Mining Company ground, a total of over 20,500 feet and had cost well over \$670,000.

The man chosen to supervise the work on the tunnel was one of the west's most picturesque mining characters, John B. "Jack" Keetley, as well known for his Pony Express riding as for his mining prowess. He reportedly purchased the famous Last Chance property at Bingham from the original locator for a horse and saddle, and paid for building a cabin on the claim with a six shooter. After working the property for a year, Mr. Keetley sold it for \$17,000. The claim has since yielded millions of dollars worth of ore.

A generous man, Mr. Keetley was particularly fond of youngsters. Many residents of Wasatch County today who were youngsters during

or Keetley, and was its
mayor.

was later incorporated with other holdings to form the "Star of Utah," which in turn became the New Park Mine.

The first major effort to produce ore in Wasatch County was the McCune Tunnel. This was driven into the mountains west of Keetley before the turn of the century, but to no avail. About the same time the McHenry Shaft was sunk in the same area, but the unfortunate prospectors, it was later discovered, missed a vast vein of ore by only 18 feet.

Another mining adventure, The St. Louis-Ontario, was conducted directly above the spot where the portal of the drain tunnel was later placed. This project also failed, perhaps because it was focused too high on the Blue Ledge slope.

In spite of these failures, the lure of gold and other precious metals enchanted many and prospecting continued. In the early 1900's the East Utah shaft was sunk, and modest fortunes sank with it. In 1905 the Columbus Tract on Bonanza Flat was worked until lack of capital ended the venture.

Further down the slope in the Glen Allen, sometimes known as the "Glencoe" excavation, hundreds of thousands of dollars were invested in determined efforts to locate pay dirt. A refining mill was constructed on the property through which discovered ore was reduced to concentrate. In 1907 John Fisher and Gail Fisher took a contract to transport this refined ore from the mill to the Denver and Rio Grande Depot in Heber City, a distance of about 12 miles. However, the Allen fortune was spent before the coveted silver vein was located.

The project "Vallejo" lay further south in the mountains west of Jordanelle, and was worked intermittently for several years, even though a heavy percentage of iron in the ore made transportation a serious problem.

William Trevithick and John Fisher leased the Vallejo property and supplied work for many Wasatch County miners and teamsters until this venture too ended in disaster. George McDonald, one of the teamsters, was headed toward Heber City with a wagon load of ore and when he drove onto the Provo River bridge northwest of the present Heber Light and Power plant, the bridge buckled, sending him and half his wagon one way and the team and the rest of the wagon and ore the other way. Mr. McDonald escaped alive, but the wagon and team were lost, and the bridge was gone. Because the ore from Vallejo could not command sufficient price to warrant construction of a new bridge and better road, the project failed.

Another persistent attempt at prospecting for ore in northern Wasatch County was the Nelson-Green, which was located in rolling hills some two miles east of Lee's Ranch. After several years of effort, the Nelson Brothers of Park City sold the property to Daniel Knold, who renamed it the Park Knold, and continued to work his claim with some profit.

The major mining development in the Keetley area began about 1921 when the Park Utah Mining Company was formed. The company con-

HOW BEAUTIFUL UPON THE MOUNTAINS

Oscar N. Friendly, prominent mining executive who was largely responsible for pin-pointing the underground wealth.

ducted systematic development work by which one of the richest ore bodies in Wasatch County was discovered. During the 1920's alone this company paid nearly three million dollars worth of dividends.

One of the persons largely responsible for pin-pointing this wealth near Keetley was Oscar N. Friendly, a native of Oregon who studied mining engineering at the University of California at Berkeley. During his summer vacation periods he worked at the old Highland Boy mine in Salt Lake's Bingham District, and also at the Daly West mine in Park City. His first full time job after graduation in 1907 was an engineer-surveyor for the Daly West property. In 1909 he became engineer and geologist for the Daly Judge Mining Co., the firm which later was the nucleus of the Park Utah Mining Company.

George W. Lambourne, head of the Daly Judge firm asked Mr. Friendly to work on classification of rock formations in the Keetley area. and it was through this work that Mr. Friendly found there was more than one occurrence of ore in the area. His development work disclosed ore bodies extending through much of the region.

Another major developer of the area was Paul H. Hunt, a native of Cleveland, Ohio, and a California schoolmate of Mr. Friendly. He served as general manager of the Park Utah Mining Company, and then in 1925 when the Judge, Daly West, Park Utah, Ontario and other properties were merged to form the Park Utah Consolidated Mining Co. Mr. Hunt was named manager and Mr. Friendly assistant general manager.

In addition to his leadership in mining, Mr. Hunt was also a member of the Wasatch County Commission and served in both houses of the Utah Legislature. He was also founder and president of the Associated Civic Clubs of Northern Utah. He retired from mining in 1955 and died in California on April 17, 1958.

As the Park Utah Mining Company was doing its development work in the 1920's in the Blue Ledge area, those owning claims on the

Paul H. Hunt, general manager of the mines at Keetley for many years, and prominent in Wasatch County civic and political circles.

south side of McHenry Canyon made concentrated efforts to reach hidden treasures they all felt lay in the mountain ranges.

One group of claimants organized the Star of Utah under the direction of Charles (Charlie) Moore and John Fisher. Several Wasatch County men participated in this mining work. By 1930 the prospects showed ore rich enough to make financial success possible, and then the great depression of the 1930's struck the area and the work was slowed down.

Jack Keeler, a bachelor whose eyesight was so poor he could scarcely

CHAPTER THIRTY-TWO

Of Mines and Men—the Story of Keetley

Few pursuits in life have had more influence on men than mining. Civilization itself prospered as men learned to take metal ores from the earth and fashion the substances into useful tools. Precious minerals and valuable ores have caused great cities and small towns to rise and fall with mining's fortunes and tides. Many men have given their lives as they struggled to take nature's treasures from deep within the earth. Mining, too, has usually written the character references of those who pursued it, as some have been motivated by a sincere desire to find things they could share and others have searched only for themselves and their greed.

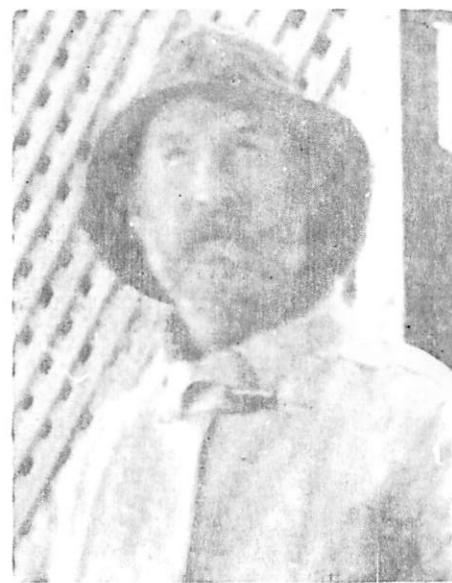

Wasatch County has been vitally concerned with mines and miners, as has already been explained in earlier chapters. Vigorous mining progress in the Park City area had a great impact on commerce and industry in Wasatch towns, and much of the county's colorful history centers around the men of the mines.

The county's northern-most settlement, the town of Keetley, owes its existence to mining activity. It was the last community in the county to be organized, and for several decades was known and identified only as a mining shaft. Its location was first plotted in 1887 when leaders of the Park City Mining District chose a point of elevation for the portal of a drainage tunnel from the properties of the Daly Mining Company and the Ontario Silver Mining Company.

The Ontario-Daly No. 2 Drain Tunnel, as the project became known, was a tremendous undertaking for the time. It was to be more than 15,000 feet in length, cost nearly half a million dollars and take six years to complete. By 1898 the tunnel had been extended from the present site of Keetley into the Daly West Mining Company ground, a total of over 20,500 feet and had cost well over \$670,000.

The man chosen to supervise the work on the tunnel was one of the west's most picturesque mining characters, John B. "Jack" Keetley, as well known for his Pony Express riding as for his mining prowess. He reportedly purchased the famous Last Chance property at Bingham from the original locator for a horse and saddle, and paid for building a cabin on the claim with a six shooter. After working the property for a year, Mr. Keetley sold it for \$17,000. The claim has since yielded millions of dollars worth of ore.

A generous man, Mr. Keetley was particularly fond of youngsters. Many residents of Wasatch County today who were youngsters during

John B. "Jack" Keetley, for whom the community of Keetley was named.

the years of construction of the Ontario-Daly Drain Tunnel remember "Jack" Keetley for his kindness to them as they romped over the hills under which his men were digging. Years later, George A. Fisher, prominent cattleman and land developer, named the community which developed in the valley below the mining project, Keetley, in honor of his "childhood hero."

The Keetley area was first prospected around 1875 and 1876. When David Keith and Thomas Kearns were prospecting in the mountains that produced the great mines of Park City, their fellow prospector, David Fisher, turned south and laid claim to the "Columbus," a tract which

George A. Fisher, who named the town of Keetley, and was its mayor.

was later incorporated with other holdings to form the "Star of Utah," which in turn became the New Park Mine.

The first major effort to produce ore in Wasatch County was the McCune Tunnel. This was driven into the mountains west of Keetley before the turn of the century, but to no avail. About the same time the McHenry Shaft was sunk in the same area, but the unfortunate prospectors, it was later discovered, missed a vast vein of ore by only 18 feet.

Another mining adventure, The St. Louis-Ontario, was conducted directly above the spot where the portal of the drain tunnel was later placed. This project also failed, perhaps because it was focused too high on the Blue Ledge slope.

In spite of these failures, the lure of gold and other precious metals enchanted many and prospecting continued. In the early 1900's the East Utah shaft was sunk, and modest fortunes sank with it. In 1905 the Columbus Tract on Bonanza Flat was worked until lack of capital ended the venture.

Further down the slope in the Glen Allen, sometimes known as the "Glencoe" excavation, hundreds of thousands of dollars were invested in determined efforts to locate pay dirt. A refining mill was constructed on the property through which discovered ore was reduced to concentrate. In 1907 John Fisher and Gail Fisher took a contract to transport this refined ore from the mill to the Denver and Rio Grande Depot in Heber City, a distance of about 12 miles. However, the Allen fortune was spent before the coveted silver vein was located.

The project "Vallejo" lay further south in the mountains west of Jordanelle, and was worked intermittently for several years, even though a heavy percentage of iron in the ore made transportation a serious problem.

William Trevithick and John Fisher leased the Vallejo property and supplied work for many Wasatch County miners and teamsters until this venture too ended in disaster. Mr. McDonald escaped alive, but the wagon and team were lost, and the bridge was gone. Because the ore from Vallejo could not command sufficient price to warrant construction of a new bridge and better road, the project failed.

Another persistent attempt at prospecting for ore in northern Wasatch County was the Nelson-Green, which was located in rolling hills some two miles east of Lee's Ranch. After several years of effort, the Nelson Brothers of Park City sold the property to Daniel Knold, who renamed it the Park Knold, and continued to work his claim with some profit.

The major mining development in the Keetley area began about 1921 when the Park Utah Mining Company was formed. The company con-

ducted systematic development work by which one of the richest ore bodies in Wasatch County was discovered. During the 1920's alone this company paid nearly three million dollars worth of dividends.

One of the persons largely responsible for pin-pointing this wealth near Keetley was Oscar N. Friendly, a native of Oregon who studied mining engineering at the University of California at Berkeley. During his summer vacation periods he worked at the old Highland Boy mine in Salt Lake's Bingham District, and also at the Daly West mine in Park City. His first full time job after graduation in 1907 was an engineer-surveyor for the Daly West property. In 1909 he became engineer and geologist for the Daly Judge Mining Co., the firm which later was the nucleus of the Park Utah Mining Company.

George W. Lambourne, head of the Daly Judge firm asked Mr. Friendly to work on classification of rock formations in the Keetley area, and it was through this work that Mr. Friendly found there was more than one occurrence of ore in the area. His development work disclosed ore bodies extending through much of the region.

Another major developer of the area was Paul H. Hunt, a native of Cleveland, Ohio, and a California schoolmate of Mr. Friendly. He served as general manager of the Park Utah Mining Company, and then in 1925 when the Judge, Daly West, Park Utah, Ontario and other properties were merged to form the Park Utah Consolidated Mining Co., Mr. Hunt was named manager and Mr. Friendly assistant general manager.

In addition to his leadership in mining, Mr. Hunt was also a member of the Wasatch County Commission and served in both houses of the Utah Legislature. He was also founder and president of the Associated Civic Clubs of Northern Utah. He retired from mining in 1955 and died in California on April 17, 1958.

As the Park Utah Mining Company was doing its development work in the 1920's in the Blue Ledge area, those owning claims on the

south side of McHenry Canyon made concentrated efforts to reach hidden treasures they all felt lay in the mountain ranges.

One group of claimants organized the Star of Utah under the direction of Charles (Charlie) Moore and John Fisher. Several Wasatch County men participated in this mining work. By 1930 the prospects showed ore rich enough to make financial success possible, and then the great depression of the 1930's struck the area and the work was slowed down.

Jack Keeler, a bachelor whose eyesight was so poor he could scarcely

detect daylight from darkness, spent his lifetime in the area digging a tunnel which later proved to be headed directly for rich ore. However, old age and infirmity forced him to yield before he struck "pay dirt." He sold his claim to the Mayflower Corp., which was working from a different portal along with the Star of Utah group. Enough ore was transported by truck to Heber City from this portal that an extension spur of the Union Pacific Railroad was built to the property in 1941.

The Star of Utah and the Mayflower tunnel developments were eventually merged to form the New Park Mine, whose stock sold briskly on the New York Stock Exchange for several years.

This lead and zinc mining firm was a weird legal tangle when William Henry Harrison Cranmer took over as its president in 1934. The property was mortgaged, titles to its lands were clouded and there was a debt of some \$100,000. Mr. Cranmer borrowed money to clear liens against the title, sold small pieces of land to neighboring mining companies and struggled in many ways to secure sufficient capital to maintain operations.

Under Mr. Cranmer's leadership the New Park Mining Company has increased its property holdings from 1,100 acres to more than 10,000 acres. The Mayflower Mine has been modernized and a Mayflower Tunnel completed.

In recent years a depressed lead and zinc market has caused Mr. Cranmer to diversify New Park's holdings to overcome a slump in the company's mining operations. Now more of a holding company than an operating concern, New Park activity has embraced exploration in phosphate, potash, copper, gold, building stone, oil and uranium. Mr. Cranmer is also exploring and developing mineral lands in Wasatch County's Snake Creek Mining District.

New Park maintains its operating office at Keetley and its executive office in Salt Lake City. Gale A. Hansen is superintendent of mines at Keetley, with offices in the community's former school building.

The growth of Keetley as a community came largely as a result of the success of the Park Utah mine in the 1920's. The Ontario-Daly No. 2 Drain Tunnel had operated in the area since the late 1890's, but had never caused much community development. The tunnel, still operated by its owners, the United Park City Mines Company, was a dual blessing when it was completed. In addition to ridding the Ontario and Daly mines of excess water, it was a boon to farmers in the low-lands. Orson Hicken, David Hicken, Fred Hicken and others dug a canal to carry the waters down to the meadows.

Even before Keetley's mining boom, Mr. and Mrs. Gail Fisher lived in the area in a rambling farm house on the Fisher Ranch. When the Union Pacific Railroad came to the Keetley area in 1923 the community's future seemed secure, and Charles Roy Lenzi of Park City was hired to paint the houses and mine buildings that had been constructed around the Ontario-Daly tunnel. When the painting was completed, Mr. Lenzi

decided to settle in the new area. He brought his family from Park City and settled in one of the nine houses along the ridge of the hill east of the mine building. Other homes were occupied by Archie Henderson, Will O'Brien, William Luke, Roy Pettie, Paul Hunt, William Fife, Ralph Stringham and George D. Blood. Later a house was built on the side of the road going down the ridge. Frank Hyde and later Harry Wallace, superintendent of the Park Utah Consolidated Mines, lived in this home. Another five families built homes in the canyon back of the mine building. These were Charles Welch, Al Ross, E. A. Hewitt, Robert Hyde and William Haueter. Mine buildings included an office, shops, boiler room, boarding house, commissary and two bunk houses. Later, two more bunk houses were built to accommodate the 500 to 600 men who came to the area in its boom days.

George A. Fisher, who did much of the land development in the area, supervised most of Keetley's growth. He built five modern homes, a combination store and gas station, and later an apartment house. He served as mayor of Keetley from the 1920's until his death in July, 1954. As mayor he directed the erection of an imposing school building.

Mr. Fisher, as mentioned earlier, also named the community in honor of Jack Keetley. This name created an interesting condition when postal service was inaugurated in the summer of 1923. Charles Roy Lenzi was named as postmaster and the service was very well received in the community. However, George Blood, acting superintendent of mines, discovered in the official community records that the town's name had been incorrectly recorded as "Keatley." A sign had even been placed over the post office with this incorrect spelling.

When the error was brought to the attention of the Postmaster General in Washington, he had to cancel the appointment of Charles Lenzi as postmaster, then recorded the name correctly and reappointed Mr. Lenzi as postmaster. This was done in November, 1923. Mr. Lenzi served continuously as Keetley's postmaster until 1952 when he retired and the post office was discontinued.

was later incorporated with other holdings to form the "Star of Utah," which in turn became the New Park Mine.

The first major effort to produce ore in Wasatch County was the McCune Tunnel. This was driven into the mountains west of Keetley before the turn of the century, but to no avail. About the same time the McHenry Shaft was sunk in the same area, but the unfortunate prospectors, it was later discovered, missed a vast vein of ore by only 18 feet.

Another mining adventure, The St. Louis-Ontario, was conducted directly above the spot where the portal of the drain tunnel was later placed. This project also failed, perhaps because it was focused too high on the Blue Ledge slope.

In spite of these failures, the lure of gold and other precious metals enchanted many and prospecting continued. In the early 1900's the East Utah shaft was sunk, and modest fortunes sank with it. In 1905 the Columbus Tract on Bonanza Flat was worked until lack of capital ended the venture.

Further down the slope in the Glen Allen, sometimes known as the "Glencoe" excavation, hundreds of thousands of dollars were invested in determined efforts to locate pay dirt. A refining mill was constructed on the property through which discovered ore was reduced to concentrate. In 1907 John Fisher and Gail Fisher took a contract to transport this refined ore from the mill to the Denver and Rio Grande Depot in Heber City, a distance of about 12 miles. However, the Allen fortune was spent before the coveted silver vein was located.

The project "Vallejo" lay further south in the mountains west of Jordanelle, and was worked intermittently for several years, even though a heavy percentage of iron in the ore made transportation a serious problem.

William Trevithick and John Fisher leased the Vallejo property and supplied work for many Wasatch County miners and teamsters until this venture too ended in disaster. George McDonald, one of the teamsters, was headed toward Heber City with a wagon load of ore and when he drove onto the Provo River bridge northwest of the present Heber Light and Power plant, the bridge buckled, sending him and half his wagon one way and the team and the rest of the wagon and ore the other way. Mr. McDonald escaped alive, but the wagon and team were lost, and the bridge was gone. Because the ore from Vallejo could not command sufficient price to warrant construction of a new bridge and better road, the project failed.
